# NexaWorks - Response to RFP-2026-017

*Predictable delivery, dependable support* | Fictional document for classroom use

## 1. Executive Summary and Understanding of the Requirement

NexaWorks proposes a configurable procurement platform delivered through a structured, milestone-driven programme. We understand that Meridian needs predictable delivery, clear ownership and smooth adoption by 300 suppliers across eleven plants.

## 2. Proposed Solution and Implementation Approach

**Architecture:** A modular platform with a documented REST API. Integration with SAP is delivered through a certified middleware adapter; SSO is supported through SAML.

**Scalability:** The platform supports 1,500 concurrent users in production environments today.

## 3. Timeline, Team Structure and Milestones

| Phase | Duration | Milestone |
|---|---|---|
| Mobilise | 2 weeks | Charter, RACI, steering committee |
| Design sprint block | 4 weeks | Signed-off process design |
| Build sprints 1-4 | 8 weeks | Fortnightly demos |
| Integration & data migration | 4 weeks | SAP adapter live |
| UAT & training | 3 weeks | UAT sign-off, trained super-users |
| Go-live & stabilise | 1 week | Production, go-live checklist |

Eleven named roles including a programme director, delivery lead, two business analysts, four engineers, a change and training lead, a QA lead and a customer success manager. A RACI matrix and weekly steering committee are included. The risk register lists twelve risks with owners and mitigations (for example data migration, supplier adoption and key-person dependency). Staffing is fixed for the full 22-week programme.

## 4. Price Table and Assumptions

| Item | Amount |
|---|---|
| Implementation (fixed price) | USD 318,000 |
| Contingency (15%, released only with approval) | USD 47,700 |
| Annual licence (per year) | USD 78,000 |
| Total cost, year 1 | USD 443,700 |
| Five-year TCO estimate | USD 755,700 |

**Assumptions:** Assumes 300 suppliers, one ERP adapter and standard reporting. Payment is tied to six milestones. A 5% discount applies if a three-year licence is signed.

## 5. Security, Compliance and Risk Controls

NexaWorks is ISO 27001 certified. SOC 2 Type II is in progress, expected next year.

Data is encrypted at rest and in transit, MFA and RBAC are supported, and audit logs are available to Meridian administrators. GDPR obligations are covered in the data processing agreement.

**Risk management:** Residual risks relate to supplier adoption and data migration quality; mitigations are in the risk register.

## 6. Support Model, Experience and References

A 24x7 support desk with a 1-hour SLA for priority 1 incidents, a defined escalation path and a dedicated customer success manager. NexaWorks has delivered six similar projects over eight years.

**References:** Three reference clients (manufacturing and logistics) are listed with contact names and project summaries.
